

I support the ARRL concerning Docket ET 03-104. The proponents of Broadband over Power Lines (BPL) have little credible scientific data to support the approval of this docket. I believe BPL will cause irreparable interference to services licensed to operate in the 2 MHz-80 MHz frequency range. The approval of ET 03-104 would violate the current FCC rules on non-interference and contrary to the best interest of the public and users of those frequencies.

Thank you,
Carl Beduhn
